

# Clean corner and stronger welding

The exclusive clean corner and stronger welding technology provides an aesthetically perfect angle with many benefits:

- design and beauty;
- strong resistance;
- greater stability of the glass;
- no infiltration.

## **Exclusive welding system**

Thanks to the latest developments in welding corners of the PVC windows - method which was immediately implemented in production standard fixtures - we can make a stronger and stable welding, aesthetically "perfect".

## **Beauty and strength**

"Clean corner", in addition of beauty and design, keeps the softness of the gasket unaltered, with greater resistance to infiltration and greater stability of the glass, for safeguarding the time performance.
